

REG Glycerin

A reliable solution for high-quality products.

REG Glycerin is a high-quality, consistent co-product from biodiesel production that REG strategically markets domestically and internationally from a growing network of biorefineries.

Consistency and Quality to Meet Your Specifications

- ▶ Multi-feedstock biodiesel sources
 - Vegetable oil and animal fat-based glycerin products
 - Glycerin quality guaranteed, regardless of biodiesel feedstock
- ▶ Quality from advanced production technology
 - Methanol recovery technology alleviates excess methanol in finished glycerin
 - Impurities are removed before, during and after biodiesel/glycerin production process
- ▶ Automated process controls glycerin quality
 - Two rolling monthly quality reports are generated and available to customers
 - Segregated glycerin storage maintains quality

Volume and Logistics to Meet Your Demands

- ▶ More than 400 million pounds of glycerin production capacity
 - Domestic and international transportation, including railcar loading
 - REG Glycerin can be used in a wide variety of markets, from animal feed to industrial applications
- ▶ Sales contracting options
 - Fixed price or indexed for fixed volume over a specific shipping period
 - Spot pricing
