

# VelociD™

## *Low-carbon solution inspiring high confidence.*

Meet your sustainability goals sooner with our EnDura Fuels™ advanced renewable solution— **VelociD™** from Renewable Energy Group.

**Reduce emissions.  
Maximize performance.**

*Clean-burning VelociD™ can  
serve as a direct replacement  
to petroleum diesel for  
maximum engine performance  
and reduced emissions  
benefits across the fleet.*

Stringent quality standards that exceed ASTM, CEN and CGSB specification requirements

Low Carbon Intensity (CI) enables decarbonization today

Compared to petroleum diesel, VelociD™ can reduce engine emissions by:  
+ Up to 100% for fossil carbon<sup>1</sup>  
+ Up to 40% for particulate matter<sup>2</sup>  
+ Approximately 15% for nitrogen oxides (NOx)<sup>2</sup>

# VelociD™

VelociD™ is a clean-burning, ultra-high Cetane hydrocarbon renewable fuel.

<sup>1</sup> Product is produced from renewable oils and fats. Methanol used to make biodiesel and hydrogen used to make renewable diesel and SAF are typically made from conventional natural gas but can be produced from renewable resources.

<sup>2</sup> Reductions based on emissions data from California Air Resources Board and compared to U.S. federal ULSD, (Durbin, et al., 2011)

## Our focus is on your success.

For more than 25 years, we've helped industries implement practical solutions to complex sustainability challenges by providing leading-edge quality, go-to-market agility, sustainable partnerships and sensible decarbonization strategies.
