

# Renewable Fuel Solutions for On-Road

Maintain peak fleet performance year-round while reducing emissions and managing costs with renewable fuel solutions for on-road fleets from Chevron Renewable Energy Group.

## Lower carbon fuels for fleets

EnDura Fuels™ is Chevron Renewable Energy Group's complete line of fuel solutions that will help you meet your company's lower carbon, performance and profitability goals.

### Simple Lower Carbon Solution

- + Carbon Intensity (CI) scores that are lower than petroleum diesel allow for reduced carbon intensity now
- + InfiniD™ is one of the lowest cost liquid fuels available today
- + Use as a drop-in fuel or as a blend with traditional fuels in existing engines using current infrastructure

### Performance Benefits

- + Higher Cetane for a shorter more complete combustion ignition time
- + Added lubricity helps engines run smoother, cooler and quieter
- + Lower particulate matter helps reduce DPF plugging and regenerations
- + Helps reduce engine maintenance costs and increased longevity

### Affordable Flexibility

- + Lower your carbon output today with a product lineup that supports your profitability goals
- + Infrastructure investments that are typically less than other alternative fuel options
- + From product selection to order placement to delivery, we work to make implementing your fuel solutions seamless
- + Growing your fleet with EnDura Fuels™ is simple; our experts can help

### Supply Assurance

- + Feedstock flexibility provides added assurance on supply
- + Peace of mind with EnDura Fuels™ in leading quality assurance

## Powerful Partnership

- + Offering unrivaled service and quality as one of the world's leading producers of bio-based fuels
- + Developing innovative products that deliver measurable carbon reduction for more than 25 years
- + Giving customers online access to information regarding their accounts and deliveries, including invoices, BOLs and volumes with our proprietary fuel dashboard
- + Providing scalability for quality, reliable renewable fuel now—for a lower carbon future
